angular使用文件系统

1. 使用 `fs` ，导入fs外部包正常，但无法使用其定义的函数，报错如下：

```
ERROR TypeError: fs__WEBPACK_IMPORTED_MODULE_0__.writeFileSync is not a
function
    at LogService.test (log.service.ts:18:5)
    at HomeComponent.test (home.component.ts:70:21)
    at HomeComponent.ngOnInit (home.component.ts:37:10)
    at callHook (core.js:2538:1)
    at callHooks (core.js:2507:1)
    at executeInitAndCheckHooks (core.js:2458:1)
    at refreshView (core.js:9499:1)
    at refreshEmbeddedViews (core.js:10609:1)
    at refreshView (core.js:9508:1)
    at refreshComponent (core.js:10655:1)
```

2. 使用 `fs-extra` ，步骤

   ○ install --save --legacy-peer-deps

   ○ angular.json

   ```
   "allowedCommonJsDependencies": [
     "stream",
     "path",
     "constants"
     ]
   ```

   ○ tsconfig.json

   ```
   "paths": {
        "stream": [ "./node_modules/stream-browserify" ],
        "path": [ "./node_modules/path-browserify" ],
        "constants": ["./node_modules/constants-browserify"]
        }
   ```

   ○ package.json

   ```
    "browser": {
      "fs": false,
      "assert": false,
      "os": false,
      "util": false
    }
   ```

   ○ 导入fs-extra正常，进入不了页面，报错如下：

   ```
   RROR Error: Uncaught (in promise): ReferenceError: process is not
   defined
   ReferenceError: process is not defined
